

15+ yrs In technology

\$1M+ Cloud & SaaS savings

100+ Brands served

10+ Systems unified

Summary

Technology and operations leader, 15+ years architecting identity, multi-cloud, and security solutions and the internal platforms organizations run on. I've spent my career on the customer's side of the table – owning a multi-cloud estate, making the migration and build-vs-buy calls, and translating technical decisions into business outcomes for the CEO and President. Google Cloud Professional Cloud Architect with deep AWS and Azure depth.

Core Competencies

Cloud architecture & migration (GCP · AWS · Azure) · Identity & access (Entra ID, SSO/SAML, SCIM, Conditional Access, Zero Trust) · Security & compliance (incident response, PCI DSS) · Infrastructure as code (Terraform, containers) · Cloud cost / FinOps · Platform engineering (Python, TypeScript, Go) · Technical pre-sales & executive communication

Experience

2010 – Present

Tillster · Commerce platform – 100+ brands, 40,000+ locations

2019–PRESENT

Senior IT Technical Project Manager (2024–Present) · Manager, Enterprise IT (2022–2024) · Lead Enterprise IT Engineer (2019–2022). Own the technology function org-wide; CEO/President-facing.

- Architected an HR-driven identity lifecycle platform (Entra ID, Microsoft Graph) automating joiner-mover-leaver across the workforce, retiring a six-figure commercial identity-governance product.
- Designed and own identity and security for the customer-facing commerce platform end to end – Auth0, SSO/authorization, and the PCI-scoped payment environment.
- Drove \$1M+ in realized cloud and SaaS savings across a ~\$300K/month AWS estate via architecture review, rightsizing, commitment planning, and vendor renegotiation.
- Built a leadership observability platform (FastAPI + React on Google Cloud Run + Cloud SQL) consolidating 10+ enterprise systems into one real-time view of IT and security health.
- Delivered AWS-to-Google-Cloud and hybrid-to-cloud-only migration tooling, including an embedded AI diagnostic assistant adopted by the support team.
- Led security incident response and forensic investigations end to end, including an executive-targeted business email compromise; built and led a team of five engineers.

TrueCar · Automotive technology

2018–2019

IT Support Analyst – systems administration for a national automotive-technology platform.

Doner · National advertising agency

2015–2018

IT Analyst – systems and infrastructure across the agency.

Apple · Information Systems & Technology

2010–2015

IT Specialist – corporate infrastructure and end-user technology in a high-standard environment.

Certifications

Google Cloud Professional Cloud Architect · AWS Solutions Architect – Associate · Microsoft Azure Administrator (AZ-104) · Jamf 300 · Certified ScrumMaster (CSM)

Education

California State University, Fullerton · B.S. Computer Science

2011
